

21st March 2007**OpSec Security Group plc****Pre closing trading update**

Prior to entering its close period for the year ending 31st March 2007 OpSec Security Group plc, the supplier of high quality anti-counterfeiting technologies and services, released today the following pre closing trading update.

The Board is pleased to confirm that the Company's core operations will all perform at record levels this year. This, coupled with an exceptional contribution from its 3dcd joint venture, which, as previously highlighted, is largely one-off in nature, leads the Board to believe that results for the current financial year will at least meet the improved expectations referred to in the Company's last trading update of 23rd January 2007.

The Company remains actively engaged in a number of discussions with potential acquisitions and expects to make further announcements on this area in due course.
