

Apparel Brand Enhancement & Trim Solutions

In fashion and apparel, it is often the small details that distinguish a winning brand from the sea of also-rans. OpSec Security provides many of the world's most elite fashion, sports and performance brands with custom trims and packaging that add value and ensure brand consistency.

Years of experience and manufacturing development provides OpSec with the bandwidth and agility to accommodate the most challenging customer requirements.

All OpSec brand enhancement products are tested to required industry standards, ensuring they provide consistent quality for a lifetime of customer use.

OpSec Security provides its apparel and accessory customers with:

- Full service capabilities (design, product development, production & distribution)
- Custom made-to-order solutions
- Rapid turn-around times
- Flexible run sizes
- Environmentally safe materials
- Latest technologies
- First-rate customer service

Labels

Clothing labels add that finishing touch that can make a brand stand apart. OpSec produces a wide range of unique woven and printed labels that can be supplied in many different formats, sizes, colors and designs, ensuring the perfect label is created to enhance brand perception.

- QR coding
- PMS color matching
- Reflective / fluorescent yarns

OpSec offers Taffeta, Damask, Satin, and Needle Loom weave formats for labels and badges, available in an unlimited range of die cut and fold structures.

Badges

OpSec's badges are ideal for sportswear, uniforms, backpacks, caps, beanies and much more. Innovative technology allows for very fine weave and embroidered designs in high definition.

Specially developed coatings allow for successful heat application of these badges. This enables the consumer to have embroidered badges without the weave coming through the inside of the garment, which can often lead to skin irritation. Heat application is ideal for badges being placed on lightweight fabrics such as performance sportswear.

- Detailed laser cut shaping
- Reflective/fluorescent yarns
- Heat application or sew on application methods
- Full range of materials include:
 - Woven
 - Embroidered
 - Woven / Embroidered
 - Silicon
 - Woven / Silicon

Zipper Pulls

Zipper pulls are a great way to reinforce branding onto garments. No matter which product is being developed (jackets, jeans, back packs, purses, etc.) a custom designed zipper pull can add a special touch and increase brand awareness.

We produce custom made zipper pulls in a variety of materials and styles including leather, woven, PU/faux leather, silicon and metal.

Packaging, Buttons & Metalwork

- Metal, plastic, glass and enamel badges and buttons
- Jeans rivets and buttons
- Metal or enamel eyelets
- Press studs
- Lace cord ends
- Metal buckles
- Laser engraving, debossing, or enamel finishes
- Hangtags, boxes and any other customised packaging solution
